### Features

#### - Ultra-compact design about as large as two business cards

This is the smallest [110 (W) × 90 (D) × 29 (H)] and lightest PC in the series. The product can contribute significantly to the miniaturization of equipment while not hindering equipment design regardless of the installation location. VESA-compliant mounting holes (100 × 100 mm) are available, and an optional attachment enables DIN rail mounting. Choose the installation method that best suits your needs.

#### - USB Type-C port for improved convenience and expandability

The product includes a Type-C port, the latest USB standard. The included Type-C port supports DP Alt Mode (DisplayPort Alternate Mode) and USB PD (Power Delivery), enabling data communication, video output, and power supply simultaneously with a single cable. Connecting to a docking station also makes it possible to include various other interfaces.

#### - Helps reduce running costs and energy consumption

This product uses the x5-E3940 low power consumption Intel Atom processor platform to achieve low power consumption while still providing sufficient performance.

#### - Fan-less design reduces maintenance work

The product is fan-less to ensure a totally spindle-less design that simplifies maintenance, relieving the concern about dust or foreign matter to get into the product. Moreover, along with minimized use of degrading parts greatly reduce maintenance work.

#### - Wireless connections to various devices via wireless LAN and Bluetooth

The wireless model is equipped with both wireless LAN and Bluetooth. The ability to connect to various peripheral devices wirelessly makes the product ideal for use as an IoT gateway and for edge computing.

#### - Safety design required for embedded applications

For Windows 10 IoT Enterprise 2019 LTSC installed type, it is possible to use the WF \*1 function of OS. It is designed for safety required for embedding purpose, for example, prohibiting unwanted writing to the HDD or SSD with WF function will relieve the concern about the writing limits to the HDD or SSD and prevent an unintentional system alteration.

#### - "Power failure protection system" features power-off without OS shutdown

Equipped with the "Power failure protection system" function that protects data and prohibits writing to storage in the event of power failure \*2. Along with the lockdown (disk writing suppression) function of Windows IoT Enterprise, power can be safely turned off without a shutdown process. Moreover, file system damage or data damage caused by sudden power failure can be avoided.

This product is a fanless embedded PC equipped with an Intel Atom® x5-E3940 (1.6 GHz) processor. Despite the ultra-compact design about as large as two business cards, the product boasts a wide operating temperature range (-30°C to +50°C) as well as excellent performance.

The product includes a rich array of interfaces, including USB Type-C (widely used in mobile devices), DisplayPort, USB 3.2 Gen 1 (USB3.0) × 2, and LAN × 2. The wireless models are equipped with wireless LAN and Bluetooth® for easy connection to digital devices, making the BX-U200 Series ideal as an IoT gateway device for connecting to peripherals.

Embedded-type CPU has been adopted. The use of readily available parts ensures the product to be applied easily. In addition, Contec-customized BIOS allows support to be provided at the BIOS level.

#### - CONTEC-customized BIOS provides useful utility

Useful utility of BIOS \*3 customized by CONTEC is provided. The "CONTEC Fast Boot" achieves Windows startup in 8 seconds. \*4

The "Disk Copy" function provides secure disk backup at the BIOS level, and also supports backup in file format or compressed file format. We also offer the CONTEC tools "BIOS update tool" for updating BIOS. \*5

\*1 UWF (Unified Write Filter) is a function of Windows 10 IoT Enterprise 2019 LTSC. They protect the disk from being actually written by redirecting the writing to RAM.

\*2 Only the M.2 SSD 128GB (TLC) model and 1TB (TLC) model are compatible with the "Power failure protection system".

\*3 For details, see each setting in the [BIOS Setup] section.

\*4 It is the actual measured value when Windows 10 and HORM function are enabled at the factory. Time may vary depending on configuration. Note that TXE, TPM, Network Stack, and SMART Self Test are not supported when the CONTEC Fast Boot is enabled.
